12/22/2023	Audi	Manufacturer Safety Recall issued - NHTSA #23V867 - Recall #93V2 HIGH VOLTAGE BATTERY MODULE(S) - Status: Remedy Not Yet Available Locate an authorized Audi dealer to obtain more information about this recall ⊖ Learn more about this recall

Description: A potentially critical self-discharge condition exists in certain high-voltage battery modules that, in some instances, may lead to thermal overload, possibly resulting in smoke or a fire. A high-voltage battery overheating increases the risk of a fire.

Remedy: Interim Monitoring Program for High-Voltage (HV) Battery Modules: Customers with online data collection activated in their vehicles will be monitored under Audis Online Field Monitoring program. Online data collection is active unless Privacy Mode is engaged in the vehicles. Audi of Americas data collection practices for purposes of monitoring for vehicle safety and other purposes are described in our privacy statement, at audiusa.com/privacy. Please see the Owners Manual to learn about the vehicles available data collection choices through Privacy Mode. As long as a vehicle has online data collection activated, Audi will retrieve and analyze data from the HV battery modules in the vehicle, as long as the vehicle is driven and Privacy Mode is not engaged. While this is not a recall remedy, it is an interim step to help monitor the vehicles HV battery modules until the recall remedy becomes available. Once the recall remedy becomes available, this monitoring program will be discontinued..If Audis Online Field Monitoring program identifies a HV battery module needing replacement, Audi will notify the owner via first-class mail, and the owner will need to schedule a service appointment with an authorized Audi dealer. The dealer will order the necessary parts and perform the replacement FREE of charge. .If Audis Online Field Monitoring program records show that one or more of the HV battery modules in a vehicle requires replacement, as a precaution, Audi recommends setting the maximum battery charge to 80%. This is an important measure to help protect the high-voltage battery modules in the vehicle until the faulty module(s) can be repaired. .The owners manual contains important information about vehicle charging and about warning lights and messages. Drivers are encouraged to review the owners manual to become familiar with charging procedures, and with the types of vehicle indicators, warnings and messaging they may see.

Glossary

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
